**A program manager focused
on establishing and
improving the global
connection between
veterinary medicine and
public health.**

SKILLS SUMMARY

-  Interational Relations
-  Program Management and Development
-  Resource Management
-  Stakeholder Management
-  Risk Management
-  Communications
-  Finances and Funding

ORGANIZATIONAL DEVELOPMENT PROFESSIONAL PERSONAL PROFILE

I am a senior program manager with the proven ability to deliver complex projects through their entire life cycle: from concept to planning and through the development and execution process. I have concentrated on international projects with innovative and responsive organizations and partners that have a compassionate focus on animals, communities and the environment. I seek out and work with forward thinking, complex international programs that challenge my skills and harness results for global communities.

OVERVIEW

INTERNATIONAL RELATIONS

- Managed programs in the Pacific Rim, Latin America and Africa
- Administered and expanded an international disaster program for global animal welfare advocates
- Liaised with local organizations to understand and navigate compliance regulations used to develop and implement administrative processes
- Assisted in the development and execution of program plans set for international implementation
- Built viable and sustainable networks with experts in the countries and cities where programs were administered
- Adapt easily to new cultural environments and work situations including communities with adverse political, social and environmental conditions
- Recognized for viewing programs and project function from a global perspective

PROGRAM MANAGEMENT AND DEVELOPMENT

- Provided strategic planning with a focus on resource and capacity building to sustain new and existing programs
- Coordinated and drove humane education within international communities both in the field and online with a focus on teacher training and school curriculum
- Reviewed organizational chapters responsible for implementation and compliance of international codes
- Analyzed program metric results to determine program effectiveness, develop improved methodologies and outline recommended action plans
- Trained professional communities including veterinary and technical support staff, disaster responders, program managers, coordinators and volunteers
- Implemented program expansion strategies to new international stakeholders
- Managed teams and staff by instituting accountability, clear expectations and performance standards to achieve program results
- Autonomously devises solutions and takes ownership of situations to ensure project success

OVERVIEW

RESOURCE MANAGEMENT

- Initiated the global distribution of educational materials and resources for international staff
- Facilitated the development and strengthening of government relations to fuel the success of international projects
- Demonstrated ability to allocate human and program resources in adverse and ideal situations in the USA and global communities
- Participated in the development of a global database designed to measure program metrics
- Skilled in data collection, analysis, management and the initial planning stages of software package development
- Participated in multiple studies that measured the economic impact of actions on global communities
- Reviewed organization's materials and manuals for suitability and implementation within their own and broader international communities

STAKEHOLDER MANAGEMENT

- Worked with International Program Directors to support their operational and management objectives
- Experienced working with organized groups, business leaders, government agencies, academia and NGO's
- Proven ability to manage intra-institutional networks and contacts related to core program issues
- Fostered relationships by reinforcing trust and respect through diplomacy and discretion

RISK MANAGEMENT

- Experienced in staff management and facilitation of training for risk and emergency management
- Evaluated risks and developed proactive strategies to overcome project obstacles
- Implemented disciplines to benefit human and animals in both man-made and natural disaster areas
- Generated efficient and effective disaster relief and recovery programs
- Recognized ability to focus on the longer term results while implementing immediate emergency responses to high risk situations

FINANCES AND FUNDING

- Researched and identified new and continued funding sources from multiple partners: government, corporate and foundations
- Supported the development of in-country fundraising opportunities for programs in US and global communities
- Successfully nurtured donors and submitted required funding updates through all projects
- Developed program budgets and negotiated costs to suit government and program partners fiscal parameters
